121 Firms-Most Yet-Give Air Conditioner Data

DETROIT-In this the biggest specifications section ever published by AIR CONDITIONING & REFRIGERATION NEWS, ment of almost every major producer in the country and most of the smaller firms operon their 1958 lines of air conditioning equipment.

In these 20 pages are included data on 51 lines of self-contained packaged commercial air conditioners, 25 lines of heat pumps, 41 lines of room air conditioners, and 87 lines of residential equipment.

This compares with 51 com-8 mercial, eight heat pump, 39 the residential and heat pump room air conditioner, and 75 fields. At the same time the residential lines by 106 companumber serving the commercial nies last year.

expansion of manufacturers into gained slightly.

field remains steady and those Significant is the continued selling room air conditioners

Represented here is the equipmost of the smaller firms operating on a regional basis.

Each type of equipment is presented separately. Lines are listed by brand name. Where brand names are different from the company name, they are listed in parentheses in the index below.

Obviously, all possible combinations of equipment made by an individual manufacturer could not be listed for space reasons alone. The commercial listings

Part Two

contains the complete air conditioning specifications listings for 1958. No specifications appear in Part I of this issue. That section is devoted to fresh, up-to-theminute articles on successful, thought-provoking sales methods and applications for air conditioning equipment.

have been limited to self-contained packaged equipment.

Where both air cooled and water-cooled equipment have practically the same specifications, only one type is listed. The other is mentioned in a footnote.

In remote residential equipment, where the possible combinations are innumerable, the most common ones have been spelled out and the others indicated in footnotes.

However, it must be emphasized, that the data presented is that offered by the manufacturer and does not represent any evaluation by the NEWS. Only editing has been in the interest of space considerations.

Even so, in many cases, the listings for individual manufacturers are swelled by the considerable number of units carried over in the line from 1957.

While this specifications report is without doubt the most complete available, there are a number of companies known to be in the field who are not represented for a number of

Niagara Furnace Div. of Forest City Foundries Co., and the Pennsylvania Furnace & Iron Co. were not yet ready to announce their lines. Iron Fireman Mfg. Co., which recently pur-chased the Timken Silent Automatic line from Scaife Co., was also not ready to announce data on this line. Fresh'nd-Aire Co. was not able to make the deadline.

Several others did not return questionnaires

Two who had lines represented in last year's specifications re-port, told the NEWS they were not offering air conditioning equipment this year. They are Richmond Plumbing Fixture Div. of Rheem Mfg. Co., and Hunter Div., Robbins & Myers, Inc.

Combustion Engineering, Inc. reported that it discontinued its air conditioning operation completely in January, 1957 to make room for additional manufacturing operations in the nuclear field.

Brunner equipment, which appeared separately last year, is now found under the Dunham-Bush listing.

CORRECTION

The B.t.u. ratings of the "Capitolaire" commercial air conditioning units on page 2 are in error. The correct ratings are as follows:

Cooling B.t.u.

Model	Capacity
COM-1W-031	37,800
COM-1A-051	62,200
COM-1W-051	62,200
COM-1A-053	62,200
COM-1W-083	89,700
COM-1W-103	126,000
COM-1W-153	183,000

ANNOUNCING: The Completely **New Edition Of**

The original edition of Air Conditioning the Home was read by more than 10,000 people vitally interested in year 'round residential air conditioning.

Now the new, larger, augmented edition, shortly to come off the press, brings you the latest, up-to-date information in the residential field:

- Why People Want and Need It
- How to Sell It at a Profit
- Market Trends Installations
- Costs
- F.H.A. Requirements

Even if you have the original edition, be sure and supplement your air conditioning library with this latest, comprehensive study of the all important residential market—compiled by the editors of Air Conditioning & Refrigeration News.

Reserve your copies now-only \$2.00 each. Mail your check with your return address to:

"AIR CONDITIONING THE HOME"
